

## **Manufacturing and International Trade Report**

Values in the Manufacturing and International Trade Report (MITR) are based on manufacturing data from the 2012 Economic Census Industry Series and administrative records from official U.S. import and export merchandise trade statistics. Data users who create their own estimates using data from this report should cite the Census Bureau as the source of the original data only.

### **Data Comparability**

Import and export data are classified using 10-digit commodity codes based on the Harmonized System. For this release, a concordance is used to map these import and export commodity codes to 7-digit NAICS Based Product Codes that are used in the Economic Census and the Annual Survey of Manufactures. Where a commodity code could be mapped to more than one 7-digit NAICS Based Product Code, a forced concordance is used to map the commodity code to the primary NAICS Based Product Code, based primarily on product value and agreed upon by subject matter experts. The 2012 MITR Concordance file may be found at:

<http://www.census.gov/foreign-trade/Press-Release/MITR/2012/2012 MITR Concordance.xls>

For a given NAICS Based Product Code, the Value of Product Shipments may be lower than the Domestic Export Value of Goods. This may occur for several possible reasons, including the following. First, the Domestic Export Value of Goods is not limited to manufacturers and may include exports from individuals and other business establishments, such as retailers and wholesalers. Second, there may be a lag between when a given product was manufactured and when it was exported, which may occur when a finished good is exported from an establishment's inventories. Third, the Domestic Export Value of Goods is actually the value at the U.S. seaport, airport or border port of export, based on the transaction price, which includes inland freight, insurance, and other charges incurred in placing the merchandise alongside the carrier at the U.S. port of exportation. Fourth, if a foreign good was imported and improved in value, the finished good would be considered domestic when exported, and its value would represent the transaction value (not just the value of the domestic value added).

### **Confidentiality**

The Census Bureau has suppressed some data in this release to protect confidentiality. Title 13 United States Code, Section 9, prohibits the Census Bureau from publishing results in which an individual's or business' data can be identified. For more information on how the Census Bureau protects the confidentiality of data, see the disclosure limitation topics listed below as appropriate.

### **Disclosure Limitation**

Disclosure limitation is the process for protecting the confidentiality of data. A disclosure of data occurs when published statistical information identifies either an individual or business that has provided information under a pledge of confidentiality. The techniques used by the Census Bureau to protect confidentiality in tabulations vary, depending on the type of data. Data in this release that are withheld to avoid disclosing data for individual companies are denoted with a 'D'. When appropriate, these data may be included in higher level totals unless disclosure also exists at the 6-digit NAICS Based Product Code.

## **Definitions of Terms**

### **NAICS**

The North American Industry Classification System (NAICS) provides a consistent industry classification system for economic analysis across the three North American Free Trade Agreement partners - Canada, Mexico and the United States. The structure of NAICS is hierarchical. The first two digits of the code designate the sector that represents one of 20 general categories of economic activities. The third digit designates the sub-sector, the fourth digit designates the industry group, the fifth digit designates the NAICS industry, and the sixth digit designates the national industry.

### **NAICS Based Product Codes**

A detailed 7-digit NAICS Based Product Code combines a six-digit NAICS code with an additional seventh digit or letter that designates the product class used by the Census Bureau to identify manufactured products in the United States. An aggregate 6-digit NAICS Based Product Code consists of one or more 7-digit NAICS Based Product Codes.

### **Special NAICS Based Product Codes Ending in 'X' or 'XX'**

The 7-digit NAICS Based Product Codes ending in 'X' or 'XX' represent the "undistributed" Schedule B exports and Harmonized Tariff System imports that cannot be mapped to any specific 7-digit codes, but are included in a higher level of aggregation at the 6-digit or 5-digit level. For example, commodity codes for sugar products do not differentiate between beet sugar and cane sugar. Therefore, these codes can only be mapped to the 5-digit NAICS-based product for sugar, represented by code 31131X.

### **Value of Product Shipments**

Value of Product Shipments includes the total value of all products produced and shipped by all producers. For selected products, this can represent value of receipts, value of production, or value of work done. Industries that are published on these unique bases are separately identified in the product line description. The manufacturing product data from the 2012 Economic Census Industry Series that are included in the MITR can be found in Table EC123112 at:

[http://factfinder2.census.gov/bkmk/table/1.0/en/ECN/2012\\_US/3112](http://factfinder2.census.gov/bkmk/table/1.0/en/ECN/2012_US/3112)

### **Export Values**

Export values of goods are provided for both Domestic Exports and Total Exports. Total Exports is defined as the sum of Domestic and Foreign Exports. Definitions of these export values are available in the Guide to Foreign Trade Statistics, which can be found at:

<http://www.census.gov/foreign-trade/guide/sec2.html#coverage>

### **Import Values**

Import values of goods are provided for both General Imports and Consumption Imports. Definitions of these import values are available in the Guide to Foreign Trade Statistics, which can be found at:

<http://www.census.gov/foreign-trade/guide/sec2.html#coverage>

### **Symbols**

D: Withheld to avoid disclosing data for individual companies; data are included in higher level totals where appropriate.

N: Trade and/or manufacturing data are not available or the codes are not linked in the concordance.
